Stand Up Bags

Stand up bags are a classic and economical option to hold a variety of items and provide a noticeable shelf presence to stand out amongst the rest.

These bags come fitted with a ziplock and tear nick for consumer use and a wide open top that is great for automated or hand filling. The inner plastic layer is designed to allow these bags to be heat sealed.

Where fitted, the one-way PBi degassing valve is ideal for coffee roasters – releasing CO₂ emitted from the beans but keeping the air-tight seal and protecting the interior contents from the damaging effects of oxygen and moisture.

All of our stock products are certified food grade and available to purchase immediately with low minimum order quantities and are a great option for branding using labels or stamps (kraft bags).

Available *without* a valve:
