## Side Gusset Bags

Our stock Side Gusset Bags are ideal for coffee distributors. They have a box like shelf presence once filled and can be packed with great efficiency. These bags have a wide opening at the top that is great for automated or hand filling. The inner plastic layer is designed to allow these bags to be heat sealed.

They come equipped with a one-way PBi degassing valve which releases CO<sub>2</sub> emitted from the beans but keeping the air-tight seal and protecting the interior contents from the damaging effects of oxygen and moisture.

All of our stock products are certified food grade and available to purchase immediately with low minimum order quantities and are a great option for branding using labels or stamps (kraft bags).

Available with PBi Filtered Valve in

### **Brown Kraft** (tape block bottom)

90 W x 225 H x 50 G (250g)
