

SHERBORNE

Box Pouch

Box pouches combine clean lines with high quality craft to provide a sharp profile that stand up on shelves with ease. Our stock box pouches are designed specifically for coffee distributors.

These bags come fitted with a degassing valve, an easy open ziplock tab, and tear nicks and have a wide opening at the top that is great for automated or hand filling. The inner plastic layer is designed to allow these bags to be heat sealed. The one-way PBI degassing valve releases CO₂ emitted from the beans but keeping the air-tight seal and protecting the interior contents from the damaging effects of oxygen and moisture.

We offer a 250g Brown Kraft pouch that has *no* valve and comes complete with an easy open ziplock tab and tear nicks.

All of our stock products are certified food grade and available to purchase immediately with low minimum order quantities and are a great option for branding using labels or stamps (kraft bags).

Available with a PBI Filtered Valve in

Brown or White Kraft
